

-Website about size

-poems that rhyme about size (size of the head, the heart and the body). The poems are divided into 2 categories: poems about small size and poems about big size

-images that will accompany poems: funny images that bring to mind big size and images that bring to mind small size

-event state used: resizing of window (event related to content)

-there will be 2 window sizes, the big and the small. When resizing within the boundaries of the big window, the poems about big size will randomly appear, accompanied by the images about big size. Similarly, when resizing within the boundaries of the small window, the poems about small size will randomly appear, accompanied by the images about small size.

-final website: a size related poem generator that will be funny in a mocking kind of way, both due to the image selection and the poems themselves

-change the position of the poems and images randomly?

-include resize me note?

## RHYMES:

### big:

His blood filled the whole sea, that is how big his body would be  
He could not even swim in the sea, that is how big his body would be  
A ship could only carry him in the sea, how big his body would be  
He had such a big head maybe it was because he read  
He had such a big head he found every book easy to be read  
He had such a big head he could talk to the dead  
He has such a big heart but don't even make me start  
He has such a big heart but he can love sugar more than art  
He has such a big heart but I don't know what to write in this part

### small:

She is thin because she can swim  
She is thin because she went up a hill  
She is thin because she will not sit  
His head is small since he hit a wall  
His head is small since he will only play ball  
His head is small since he is above all  
He might have a small heart but his experience was off the chart  
He might have a small heart but it was set on art  
He might have a small heart but he knew a lot about Greek art

She is thin because  
she can swim

He could not even swim in the sea  
that is how big his body would be
